

POSITIVE EFFECTS OF ACQUISITION

Acquisition of a smaller competitor has increased the market share of the Technology Company, which has improved its operations. Consequently, the share price grew by 20 €.

MARK THE MARKET PRICE

POSITIVE ESG RATING

The production of energy from renewable sources has put the Energy Company in the focus of investors who consider environmental factors of operation (ESG).
The share price rose by 20 €.

MARK THE MARKET PRICE

NEW MEDICINE

The Pharmaceutical Company has introduced a new medicine. Expectations of high sales of the medicine have raised the company's share price by 20 €.

MARK THE MARKET PRICE

HIGH DIVIDEND

The Financial Company will pay a high dividend to shareholders in the middle of the year. This has attracted new investors. The share price jumped by 20 €.

MARK THE MARKET PRICE

COMPETITION LOWERS PRODUCT PRICES

There is high competition in the electric vehicle industry. The Technology Company was forced to lower the selling prices of its vehicles, which reduced annual profit. The share price fell by 20 €.

MARK THE MARKET PRICE

ENVIRONMENTAL DISASTER

An oil spill from the Energy Company's tanker caused an environmental disaster. A large number of fish and birds died. The company's share price lost 20 €.

MARK THE MARKET PRICE

FALL IN CURRENCY VALUE

The Pharmaceutical Company sells many medicines in foreign markets. Because foreign currencies fell in value against the euro, the company's sales (measured in euros) were lower than planned at the end of the year. Shares lost 20 €.

MARK THE MARKET PRICE

FINE FOR CARTEL AGREEMENT

The Financial Company was accused of cartel agreement and violating anti-monopoly legislation. The European Commission imposed a high fine on all involved banks. The share price of the Financial Company fell by 20 €.

MARK THE MARKET PRICE

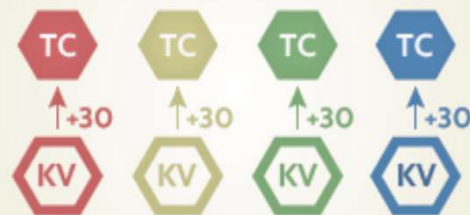

NEW STOCK INDEX

The stock exchange published a new stock index, thereby attracting new index funds (ETFs) to trading, which began aggressively buying shares of all four companies. This raised the share prices of all four companies by 30 €.

MARK THE MARKET PRICES

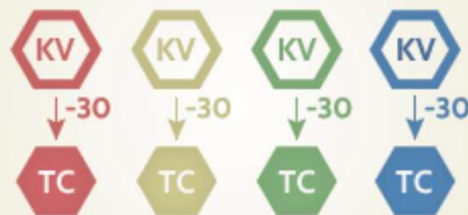

START OF A BEARISH TREND

The companies' operations did not justify the growth of their shares. Investors interrupted the price growth (bull trend) by selling investments. A falling (bearish) trend prevailed on the market. All share prices fell by 30 €.

MARK THE MARKET PRICES

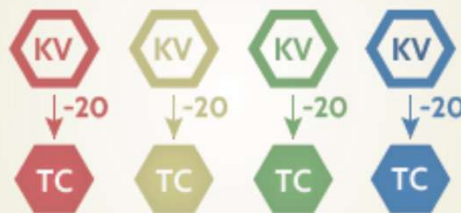

PRE-HOLIDAY SALES

The well-known stock market saying, "Sell in May and go away!", which predicts pre-holiday share sales, came true. The share prices of all four companies lost 20 €.

MARK THE MARKET PRICES

STOCK MARKET CRASH

The economy fell into a deep recession. The stock index lost 50% of its value in a month. The value of shares of all four companies was halved.

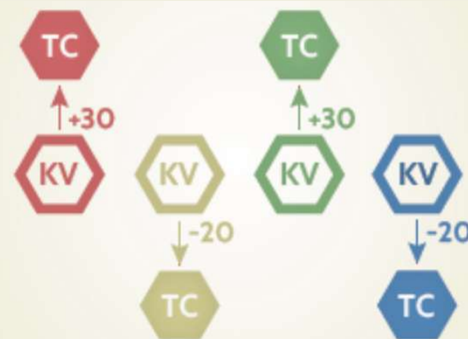

Place the market price cursors (TC) of the RED, YELLOW, GREEN, and BLUE companies at prices that are half the book values (KV). If the price is not divisible by 2, round the TC down, e.g., if KV is 30 €, TC is 10 €; if KV is 50 €, TC is 20 € etc. If KV is 10 €, TC is also 10 €.

TAX REFORM

Tax reform encourages investment in the development of new technologies and medicines, while additionally taxing bank profits and raising excise duties on fossil fuels. The share prices of the Technology and Pharmaceutical Company gained 30 €, and the Energy and Financial Company lost 20 €.

MARK THE MARKET PRICES

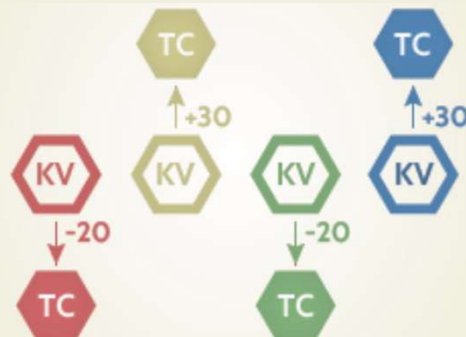

QUARTERLY REPORTS

The quarterly financial reports of the Energy and Financial Company pleased investors. The value of shares of both companies rose by 30 €. The Technology and Pharmaceutical Company, however, disappointed with the reports, and the value of their shares lost 20 €.

MARK THE MARKET PRICES

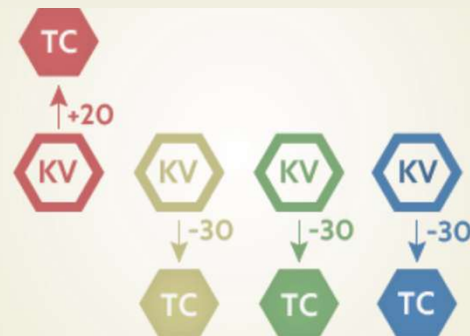

ARTIFICIAL INTELLIGENCE DRIVING DEVELOPMENT

The Technology Company made progress in the field of artificial intelligence and introduced innovations applicable in everyday life. Technology shares became "hotcakes," while traditional sectors lost investor interest. The share price of the Technology Company gained 20 €, and the share prices of the remaining companies lost 30 €.

MARK THE MARKET PRICES

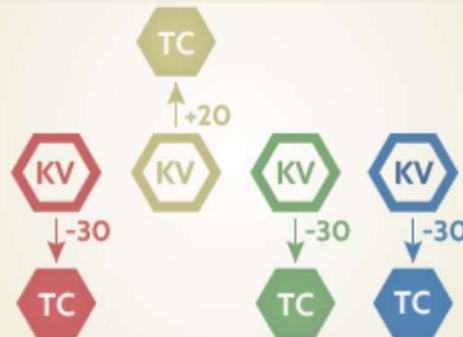

HIGHER ENERGY PRICES

Higher energy prices positively affect the operations of the Energy Company but represent higher operating costs for the other three. The share price of the Energy Company rose by 20 €, and the share prices of the remaining three companies fell by 30 €.

MARK THE MARKET PRICES

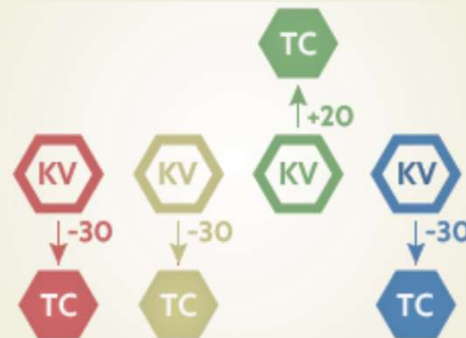

PHARMA - A SAFE HAVEN

Stock prices became overheated, and investors began to look for more conservative investments. In addition to precious metals and bonds, this includes shares of the non-cyclical pharmaceutical sector. The share price of the Pharmaceutical Company gained 20 €, and the share prices of the remaining three companies lost 30 €.

MARK THE MARKET PRICES

INTEREST RATE INCREASE

Due to high inflation, the central bank raised the interest rate. The increase positively affects the operations of the Financial Company but negatively affects the operations of the remaining companies. The share price of the Financial Company gained 20 €, and the share prices of the remaining companies lost 30 €.

MARK THE MARKET PRICES

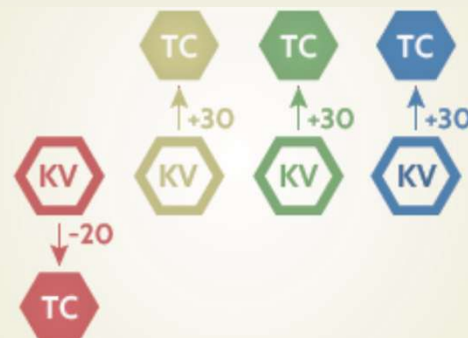

DELAYS IN DEVELOPMENT

The Technology Company postponed the development of the autonomous vehicle system by two years. The negative news pushed the share price 20 € lower. However, buying euphoria prevails on the stock exchange, which raised the prices of the remaining companies by 30 €.

MARK THE MARKET PRICES

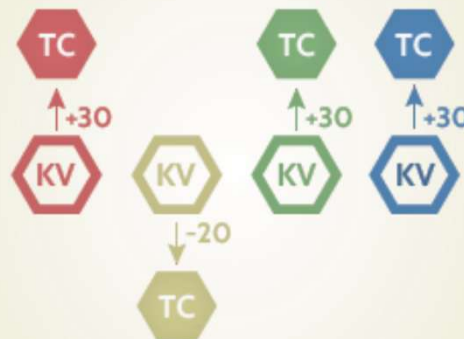

FALL IN OIL PRICE

OPEC+ members agreed to increase the amount of oil extracted, which significantly lowered the prices of oil derivatives. Consequently, the share price of the Energy Company fell by 20 €, and the share prices of the remaining companies increased by 30 €.

MARK THE MARKET PRICES

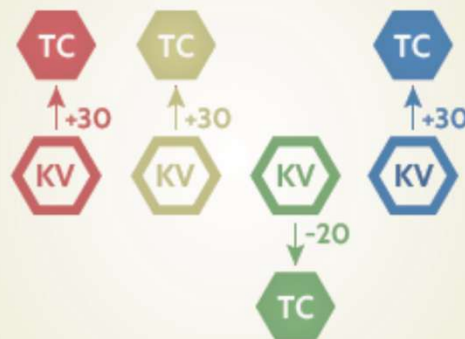

END OF THE PANDEMIC

The World Health Organization (WHO) announced the end of the viral pandemic. The share price of the Pharmaceutical Company, which recorded record sales during the pandemic, lost 20 € on the news. For the remaining companies, the positive news raised their share prices by 30 €.

MARK THE MARKET PRICES

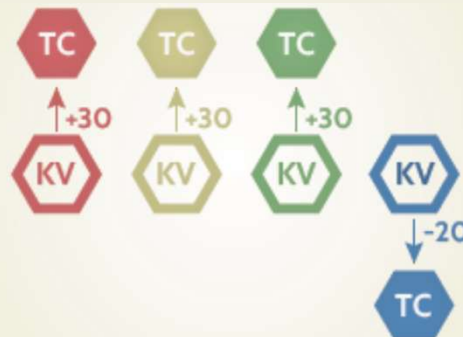

LOW INTEREST RATES

Low interest rates reduced the profit of the Financial Company. Cheaper borrowing and consequently high household consumption brought high profits to the remaining companies. The share price of the Financial Company fell by 20 €, and the share prices of the remaining companies rose by 30 €.

MARK THE MARKET PRICES

INDUSTRY CONSOLIDATION

The Technology Company has long been an acquisition target for technology giants. Today, one of them announced an acquisition intention and offered shareholders a 100-percent premium.

Shareholders of the RED company can sell their shares at double the current book value (KV). If you decide to do so, you must sell all your shares in the RED company and may not buy shares in the RED company in this round.

ACQUISITION OF THE ENERGY COMPANY

A multinational corporation announced the acquisition of the Energy Company. They offer shareholders an acquisition premium of 100%.

Shareholders of the YELLOW company can sell their shares at double the current book value (KV). If you decide to do so, you must sell all your shares in the YELLOW company and may not buy shares in the YELLOW company in this round.

MANAGEMENT BUYOUT

The management of the Pharmaceutical Company took advantage of the low share price and announced its intention to take over the company. They offered shareholders a buy-out of shares at double the current book value.

Shareholders of the GREEN company can sell their shares at double the current book value (KV). If you decide to do so, you must sell all your shares in the GREEN company and may not buy shares in the GREEN company in this round.

HOSTILE TAKEOVER

A competing company wants to increase its market share, so it announced the acquisition of the Financial Company. Although it is a hostile takeover, they offer a generous 100-percent premium per share.

Shareholders of the BLUE company can sell their shares at double the current book value (KV). If you decide to do so, you must sell all your shares in the BLUE company and may not buy shares in the BLUE company in this round.

SQUEEZE-OUT OF MINORITY SHAREHOLDERS

The Companies Act allows major shareholders to squeeze out minority shareholders.

The largest shareholders of an individual company can buy all the shares of that company from the smallest shareholders (who hold more than 0 shares) at book values (KV). If you decide to do so, you must buy all the shares of that company from the players. If multiple players have the same number of shares, the largest shareholder is the one with the highest total portfolio value, and the smallest is the one with the lowest total portfolio value. Purchases of these shares do not count towards the purchases in the round.

FREEZING OF SHAREHOLDERS' RIGHTS

Due to a violation of the Takeover Act, the market supervision agency has frozen the largest shareholders' rights.

The largest shareholders of an individual company may not trade the shares of that company in this round, nor do they receive dividends. This only applies to the shares of the companies where you are the largest shareholder at the beginning of the round; it does not apply to the remaining shares in your portfolio. If multiple players have the same highest number of shares of one company, the prohibition applies to all those players.

TRADING HALT

Predictions of poor company performance and a change in management appeared in the media. The company did not officially comment on the information, so stock exchange temporarily suspended trading of the share to protect investors.

Roll a die, which determines the color of the company (if you roll white, repeat the roll). In this round, you cannot trade shares of the company in the color indicated by the die. Throughout the round, you still place new branches of this company, and shareholders receive dividends.

ANTITRUST LAW

The antitrust law mandates the breakup of large companies into several smaller units.. Correct the price (KV) on the price list accordingly.

All chains larger than three branches must be divided into smaller ones - a maximum of three and a minimum of two branches. New chains can be placed anywhere on the board, but in accordance with the rules. If there is no other way, you can remove a solitary branch or a smaller chain of another company when moving a chain. If you remove a chain, all (!) shareholders of that company pay losses. Correct the price of stocks (KV) accordingly. First, divide the red chains, then yellow, green, and blue. The largest shareholder of the individual company decides on the division. If several largest shareholders have the same number of shares, they decide by agreement. If no one is a shareholder, the Stockbroker decides.

POLITICAL CRISIS DROVE AWAY NEW INVESTMENTS

The political crisis in the country drove away company investments and deepened the economic crisis.

The market maker rolls a numbered die. Remove all solitary branches from the field indicated by the die (from the game). If you removed the only branch of the company, move the KV cursor to the starting point. Shareholders of this company pay losses.

In this round, no player can place new branches on the field indicated by the die. If you roll the die with this field on your turn, skip the step of placing a new branch.

OCEAN CLEANUP

The Technology Company introduced a new technology for cleaning microplastics from seas and oceans.

Since you also contributed funds for development, you can move one field forward on the charity level scale on your turn, by donating only half the amount of the targeted field.

HELP FOR ENDANGERED AREAS

At a conference on the green energy transition the Energy company highlighted climate change resulting from the excessive use of fossil fuels.

The company donated funds to protect endangered areas.

Since you also donated funds, you can move one field forward on the charity level scale on your turn, by donating only half the amount of the targeted field.

MEDICINES FOR THE CHILDREN IN THE DEVELOPING WORLD

At the initiative of the Global Humanitarian Organization, a group of pharmaceutical companies donated medicines for the children in the developing World.

Since you also participated in financing the action, you can move one field forward on the charity level scale on your turn, by donating only half the amount of the targeted field.

FINANCING ENVIRONMENTAL PROJECTS

The Financial Company issued a green bond for financing the environmental projects. At the presentation event, all attendees were invited to a joint environmental cleanup action.

Since you responded to the invitation, you can move one field forward on the charity level scale on your turn, by donating only half the amount of the targeted field.
